DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Groups I-IV, claim(s) 1-15 and 22-27 (in part), drawn to a promoter, and an expression cassette and plant comprising said promoter; wherein the invention encompasses a promoter having a specific sequence; and wherein the specific sequence for Groups I-IV is SEQ ID NO: 1-4, respectively. Claims that do not read on the elected sequence will be withdrawn from consideration. The Examiner requests that the Applicant please inform the Examiner of which claims read on the elected sequence.

Group V, claim(s) 16 and 17, drawn to an available site of a plant which is obtained from a plant comprising at least one promoter promoting specific expression.

Group VI, claim(s) 18-20, drawn to a method for producing a desired gene product at a desired site.

Group VII, claim(s) 21, drawn to a gene product.

2. The inventions listed as Groups I-VII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The technical feature linking groups I-VII is a plant promoter found using genomics tools or a gene product of a transcript identified by genomics tools. Aharoni et al (PMB (2001) Vol. 48, pp. 99-118) teach the use of DNA microarrays to identify expression patterns (see first paragraph on page 99), and it would not involve an inventive step to identify promoters associated with transcripts identified by this method. They teach gene products from transcripts identified this way (see paragraph bridging pages 115-116). Therefore, the technical feature linking the inventions of groups I-VII does not constitute a special technical feature as defined by PCT Rule 13.2 as it does not define a contribution over the prior art.

Accordingly, Groups I-VII are not so linked by the same or a corresponding special technical feature as to form a single general inventive concept.

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Cathy K. Worley whose telephone number is (571) 272-8784. The examiner can normally be reached on M-F 10:00 - 4:00.
